## Publisher's Letter

Dear Reader,

Welcome to *IFSA Publishing's* advanced sensors and measurements books catalogue. IFSA Publishing provides the best information and latest knowledge on modern advancements in the area of sensors and measurements. Our books are perfect resources for scientists at all levels, from researchers, seeking to refresh their knowledge or bring skills up to date, to graduate and post-graduate students learning advanced topics for the first time. Our authors, who are located around the world and whom we consider to be experts in their fields, write for practitioners, engineering and educational staff. This catalogue features all related publications for 2011/2016 and also includes bestsellers, handbooks and encyclopedias.

And we are especially proud of our monthly *Sensors & Transducers* journal (ISSN: 2306-8515, e-ISSN 1726-5479) and book series including *Advances in Sensors: Reviews; Measurement of Physical and Chemical Quantities; and Sensors & Signals*.

We publish all our content as print books and e-books (in pdf format). All our titles are available from our web site and through major resellers such as *Ingram, Barnes & Noble and Amazon*. We work closely with many libraries, booksellers and distributors to provide them with special discount and access to the most up-to-date scientific and engineering content.

Enjoy perusing this catalog, and be sure to visit our web site to find out more about our books range or to recommend them to your librarian; information on ordering; becoming IFSA author; contact information about our sales office; and much more: [http://www.sensorsportal.com/HTML/IFSA\\_Publishing.htm](http://www.sensorsportal.com/HTML/IFSA_Publishing.htm)

### Become an Author with IFSA Publishing

If you would like to submit an open access book proposal to *IFSA Publishing*, we'd love to hear about it. Our goal is to add value to your ideas by offering expertise feedback, worldwide visibility and author benefits after publication. Authors from appropriate science and engineering, from academia, research institution and industry, who are involved in conception, design, development, analysis and application of sensors, transducers, DAQ systems, measuring instruments and systems are invited to contribute. These proposals may include technical references, application engineering handbooks, monographs, guides and textbooks. Also edited survey books, state-of-the art or state-of-the-technology are of interest to us. To submit a proposal for consideration, please download the **Book Proposal Form**, form our web site, fill-in it and send by email along with a relevant writing sample (e.g. recent journal article, book chapter or conference paper) and your current CV with publishing history to: [editor@sensorsportal.com](mailto:editor@sensorsportal.com)

Thank you,

*Sergey Y. Yurish*

*Publisher*

## Digital Sensors and Sensor Systems: Practical Design

Sergey Y. Yurish,  
Excelera S.L., Spain

The goal of this book is to help the practitioners achieve the best metrological and technical performances of digital sensors and sensor systems at low cost, and significantly to reduce the time-to-market. The book will greatly benefit undergraduate and at PhD students, engineers, scientists and researchers in both industry and academia. It is especially suited for engineers, working for OEM electronics market, sensor industry, and using commercial-off-the-shelf components, as well as anyone facing new challenges in technologies, and those involved in the design and creation of new digital sensors and sensor systems, including smart and/or intelligent sensors.

Hardcover, 2011, 420 pages, ISBN: 978-84-616-0652-8, € 135.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-615-6957-1, € 110.00

## Non-Dispersive Infrared Gas Measurement

Jacob Y. Wong  
and Roy L. Anderson,  
Airware, Inc., USA

Written by experts in the field, this book begins with a brief survey of various gas measurement techniques and continues with fundamental aspects and cutting-edge progress in NDIR gas sensors in their historical development. Providing sufficient background information and details, the Non-Dispersive Infrared Gas Measurement is an excellent resource for advanced level undergraduate and graduate students as well as researchers, instrumentation engineers, applied physicists, chemists, material scientists in gas, chemical, biological, and medical sensors to have a comprehensive understanding of the development of non-dispersive infrared gas sensors and the trends for the future investigation.

Hardcover, 120 pages, 2012, ISBN: 978-84-615-9732-1, € 89.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-615-9512-9, € 79.95

## Strain Measurement

### Measurement of Physical and Chemical Quantities Series, Vol. 1

Maria Teresa Restivo,  
Fernando Gomes de Almeida,  
Maria de Fátima Chouzal,  
Portugal

The book deals with measurement of stresses and strains in mechanical and structural components. This topic is related to such diverse disciplines as physical and mechanical sciences, engineering (mechanical, aeronautical, civil, automotive, nuclear, etc.), materials, electronics, medicine and biology. The different subjects exposed in this book are presented in a very simple and easy sequence, which makes it most adequate for engineering students, technicians and professionals, as well as for other users interested in mechanical measurements and related instrumentation. The different chapters include several multimedia components such as animations, simulations and video clips.

Hardcover, 106 pages, 2012, ISBN: 978-84-616-0067-0, € 109.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-617-3617-1, € 89.95

## Displacement Measurement

### Measurement of Physical and Chemical Quantities Series, Vol. 2

Maria Teresa Restivo,  
Fernando Gomes de Almeida,  
Maria de Fátima Chouzal,  
Portugal

This book is addressed to researchers with different backgrounds and presents the various physical principles and associated techniques for displacement measurement. These comprehend the most classical techniques, based on the measurement of variations with displacement of electrical resistance, capacitance and inductance, or else optical techniques using electromagnetic, acoustic or interference wave measurements, still with open fields of research and offering a wide range of applications. The authors discuss the advantages and limitations of the various techniques and provide information on the ranges of measurements and associated accuracy.

Hardcover, 100 pages, 2014, ISBN: 978-84-616-0067-0, € 69.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-617-3617-1, € 49.99

## Modern Sensors, Transducers and Sensor Networks

### Advances in Sensors: Reviews, Vol. 1

*Sergey Y. Yurish, Editor*

The book contains dozen advanced state-of-the-art reviews written by 31 experts from academia and industry from 9 countries: Canada, Egypt, India, Malaysia, New Zealand, Spain, Taiwan, UK and USA. Coverage includes current developments in sensing nanomaterials, technologies, design, synthesis, modeling and applications of sensors, transducers and wireless sensor networks, signal detection and advanced signal processing, as well as new sensing principles and methods of measurements.

Paperback, 422 pages, 2012, ISBN: 978-84-615-9613-3, €179.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-615-9012-4, €162.95

## Sensors and Biosensors, MEMS Technologies and its Applications

### Advances in Sensors: Reviews, Vol. 2

*Sergey Y. Yurish, Editor*

The second volume titled 'Sensors and Biosensors, MEMS Technologies and its Applications' from the 'Advances in Sensors: Review' Book Series contains eighteen chapters with sensor related state-of-the-art reviews and descriptions of the latest achievements written by experts from academia and industry from 12 countries: China, India, Iran, Malaysia, Poland, Singapore, Spain, Taiwan, Thailand, UK, Ukraine and USA.

Paperback, 558 pages, 2013, ISBN: 978-84-616-4154-3, €179.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-616-4153-6, €162.95

## Sensors, Transducers, Signal Conditioning and Wireless Sensors Networks

### Advances in Sensors: Reviews, Vol. 3

*Sergey Y. Yurish, Editor*

19 chapters with state-of-the-art reviews and descriptions of latest achievements written by 55 authors from 19 countries. Coverage includes current developments in physical sensors and transducers, chemical sensors, biosensors, sensing materials, signal conditioning energy harvesters and wireless sensor networks. This book ensures that our readers will stay at the cutting edge of the field and get the right and effective start point and road map for the further researches and developments.

Paperback, 404 pages, 2016, ISBN: 978-84-608-7704-2, €175.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-608-7705-9, €150.00

## Sensors and Applications in Measuring and Automation Control Systems

### Advances in Sensors: Reviews, Vol. 4

*Sergey Y. Yurish, Editor*

The 4<sup>th</sup> volume contains 24 chapters with sensor related state-of-the-art reviews and descriptions of latest advances in sensor related area written by 81 authors from academia and industry from 20 countries. Every chapter in this book is independent and self-contained. This book ensures that our readers will stay at the cutting edge of the field and get the right and effective start point and road map for the further researches and developments. By this way, they will be able to save more time for productive research activity and eliminate routine work.

Paperback, 504 pages, 2016, ISBN: 978-84-617-7596-5, €138.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-617-7597-2, Open Access

## Handbook of Laboratory Measurements and Instrumentation

*Maria Teresa Restivo, Fernando Gomes de Almeida, Maria de Fátima Chouzal, Joaquim Gabriel Mendes and António Mendes Lopes, Portugal*

The book presents experimental and laboratory activities with an approach as close as possible to reality, even offering remote access to experiments, providing to the reader an excellent tool for learning laboratory techniques and methodologies. This unique methodological book includes dozens videos, animations and simulations following each of chapters. It makes the title very valued and different from existing books on measurements and instrumentation. The set of open questions that closes each module is intended to provide formative assessment.

**e-Book, Acrobat (pdf) + media files, 211 pages, 2011, e-ISBN: 978-84-615-1138-9, €98.00**

## Sensors & Signals

*Sergey Y. Yurish and Amin Daneshmand Malayeri, Editors*

Sensors & Signals is the first book from the Book Series of the same name published by IFSA Publishing. The book contains eight chapters written by authors from universities and research centers from 12 countries: Cuba, Czech Republic, Egypt, Malaysia, Morocco, Portugal, Serbia, South Korea, Spain and Turkey. Each chapter of the book includes a state-of-the-art review in appropriate topic as well as the selected appropriate references at the end. With its distinguished editors and international team of contributors Sensors & Signals is suitable for academic and industrial research scientists, engineers and PhD students working in the area of sensors and its applications.

**Hardcover, 208 pages, 2015, ISBN: 978-84-608-2320-9, € 59.99 e-Book, Acrobat (pdf), e-ISBN: 978-84-608-2319-3, € 49.99**

## Handbook of Thermometry and Nanothermometry

*S. Yatsyshyn, B. Stadnyk, Ya. Lutsyk, L. Buniak, UA*

The book presents and explains of main catchwords in the field of temperature measurements and nano-measurements. This the first, well-illustrated in full color, encyclopedia contains

more than 800 articles (vocabulary entries) in thermometry and nano-thermometry, and covers nearly every type of temperature measurement device and principles. At the end of book the authors provide a useful list of references for further information. Written by experts, the book at the first place is destined for all who are not acquainted enough with specificity of temperature measurement but are interested in it and study literary sources in this realm. The authors tried to enter maximally on catchwords list the issues, which refer directly or indirectly to thermometry as well as to nanothermometry.

**Paperback, 486 pages, 2015, ISBN: 978-84-606-7518-1, €169.99 e-Book, Acrobat (pdf), e-ISBN: 978-84-606-7852-6, €129.99**

## The Human Eye: an Intelligent Optical Sensor

**(The Inverted Retina: a Diffractive-optical Correlator)**

*Norbert Lauinger, Germany*

The book shows that the human eye from the prenatal structuring of the inverted retina hardware on up to the design of the central cortical visual pathway is not only different from but also radically more intelligent than a camera. A fascinating book for all those wondering that the brightness of a scene is not cut in half and that the visible world doesn't collapse into a flat 2D-image when closing one eye. Of great interest for students, scientists and engineers in eye-, vision- and brain-research, neuroscience, psychophysics, ophthalmology, psychology, optical sensor and diffractive optical engineering. Practical applications are the search for a retinal implant of the next generation and a helpful strategy against myopia in early childhood.

**Paperback, 410 pages, 2014, ISBN: 978-84-617-2934-0, €179.99 e-Book, Acrobat (pdf), e-ISBN: 978-84-617-2955-5, €134.99**

## Ionic Polymer Metallic Composite Transducers for Biomedical Robotics Applications

Andrew J. McDaid  
and Kean C. Aw,  
New Zealand

The book describes a cluster of research which aims to not only the state of art through scientific progress in a specific smart material actuator, but also serves as a guideline to demonstrate the techniques in which many issues around developing future smart material actuators can be solved. Traditionally actuators are well known and understood and so, designing mechanical devices is almost trivial. But developing 'smart' devices for complex medical applications requires designing from a fundamental standpoint. This research-design-development process is described in the book. To this end, six biomedical devices have been developed, by first creating a new physics based design oriented model of the actuators, in order to be able to completely simulate the system and prove the design before committing to implementation.

Hardcover, 246 pages, 2014, ISBN: 978-84-616-7669-9, € 110.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-616-7670-5, € 90.00

## Magnetic Sensors and Applications Based on Thin Magnetically Soft Wires with Tunable Magnetic Properties

A. Zhukov and V. Zhukova,  
Spain

This book on magnetic microwires for magnetic sensors applications is inspired by a rapidly growing interest in the development of functional materials with improved magnetic and magneto-transport properties and in sensitive and inexpensive magnetic sensors. The research is demanded by the last advances in technology and engineering. Certain industrial sectors, such as magnetic sensors, microelectronics or security demand cost-effective materials with reduced dimensionality and desirable magnetic properties (i.e., enhanced magnetic softness, giant magnetic field sensitivity, fast magnetization, switching etc.). This book can be of interest for PhD students, postdoctoral students and researchers working in the field of soft magnetic materials and applications.

Hardcover, 154 pages, 2014, ISBN: 978-84-617-1087-4, € 105.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-617-1866-5, € 85.00

## Nanosensors: Materials and Technologies

Nada F. Atta, Editor

The book aims to provide the readers with some of the most recent development of new and advanced materials such as carbon nanotubes, graphene, sol-gel films, self-assembly layers in presence of surface active agents, nanoparticles, and conducting polymers in the surface structuring for sensing applications. The emphasis of the presentations is devoted to the difference in properties and its relation to the mechanism of detection and specificity. Miniaturization is of unique importance for sensors applications. The chapters of this book present the usage of robust, small, sensitive and reliable sensors that take advantage of the growing interest in nanostructures.

Hardcover, 298 pages, 2013, ISBN: 978-84-616-5378-2, €110.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-616-5422-2, €90.00

## MEMS Pressure Sensors: Fabrication and Process Optimization

Parvej Ahmad Alvi, India

So far, no book has descry-bed the step by step fabrication process sequence along with flow chart for fabrication of micro pressure sensors, and therefore, the book has been written taking into account various aspects of fabrication and designing of the pressure sensors as well as fabrication process optimization. A complete experimental detail before and after each step of fabrication of the sensor has also been discussed. This leads to the uniqueness of the book. The book will greatly benefit undergraduate and postgraduate students of MEMS and NEMS course, process engineers and technologists in the microelectronics industry as well as MEMS-based sensors manufacturers.

Hardcover, 176 pages, 2012, ISBN: 978-84-616-2207-8, €139.99  
e-Book, Acrobat (pdf), e-ISBN: 978-84-616-2438-6, €109.99

## Online Experimentation: Emerging Technologies and IoT

*Maria Teresa Restivo, Alberto Cardoso and António Mendes Lopes*

The book describes online experimentation, using fundamentally emergent technologies to build the resources and considering the context of IoT. The contributions of this book show the effectiveness of the use of emergent technologies to develop and build a wide range of experiments and to make them available online, integrating the universe of the IoT. Written by experts from 15 countries of all continents, this book is suitable for all who is involved in the development design and building of the domain of remote experiments.

Paperback, 496 pages, 2015, ISBN: 978-84-608-5977-2, €115.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-608-6128-7, €95.00

## Cyber-Physical Systems: Metrological Issues

*S. Yatsyshyn and B. Stadnyk*

This book presents and considers main trends in the branch of metrology of cyber-physical systems, which are becoming a key element of everyday life. First of all it is destined for engineers, lecturers, students, persons who are not acquainted enough with specificity of cyber-physical systems and their metrology but are interested in it. The authors tried to highlight emergence and development of these systems, combined with the study of their metrology provision and support.

Paperback, 326 pages, 2016, ISBN: 978-84-608-9962-4, €129.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-617-6200-2, €99.95

## Sensors and Measurement Techniques for Chemical Gas Lasers

*Mainuddin, Gaurav Singhal, A. L. Dawar, India*

Sensing and Measurement is the key technology area in the development of these lasers. Advanced sensing and measurement technologies are required to acquire, analyze and transform data into information that is useful to enhance the performance and capabilities of these lasers systems. Beginning with a brief introduction to the basic concepts of sensors and transducers, classification of various sensors, the monograph discusses characteristics of various sensors, sensor signals, signal conditioning and their operations in chemical lasers scenarios.

Hardcover, 210 pages, 2014, ISBN: 978-84-617-1152-9, €115.00  
e-Book, Acrobat (pdf), e-ISBN: 978-84-617-1865-8, €95.00

## Air Gauges: Static and Dynamic Characteristics

*Czesław Janusz Jermak and Mirosław Rucki, Poznan University of Technology, Poland*

'Air Gauges: Static and Dynamic Characteristics' advanced book presents results of the researches and theoretical investigations on the air gauges. The reader will improve his knowledge on the air gauge performance and modeling, will find description of the investigation apparatus and interesting patented solutions of the innovative air gauging heads and measuring systems. Each chapter has its own conclusion section to help the reader to recall the most important information leading to the next step of the researches.

Hardcover, 150 pages, 2012, ISBN: 978-84-616-0237-7, €109.95  
e-Book, Acrobat (pdf), e-ISBN: 978-84-616-0237-7, €89.95

# 10 Top Reasons

to Publish Open Access Books with *IFSA Publishing*

Publish your Open Access Book with IFSA Publishing and get a tablet for free!

More details are available on IFSA Publishing's web site:  
[http://www.sensorsportal.com/HTML/IFSA\\_Publishing.htm](http://www.sensorsportal.com/HTML/IFSA_Publishing.htm)

Today, many big and small publishers propose open access books publication. How IFSA Publishing open access books differ? Let to be focused on the main benefits:

- **The maximum number of pages is not limited.** Now you should not spend a lot of time and can eliminate additional efforts to put your manuscript in the limited number of page (for example, 350 pages). Create without limitations!
- **Very reasonable fixed price,** which does not depend on the number of book pages. The publication fee is lower in comparison with other established publishers and is constant regardless of the number of pages.
- **High visibility.** All IFSA Publishing's books are listed on Sensors Web Portal (3,000 visitors per day) a primary Internet sensors related resource, increasing visibility and discoverability for your work. Information about published books also included in IFSA Newsletter (55, 000+ subscribers) and announced in professional LinkedIn Sensors Group (2,600+ members) at no additional charge to ensure the maximum possible distribution. As a result, citation rates of our authors are increased.
- **All book types accepted.** IFSA Publishing accepts complete monographs, edited volumes, proceedings, handbooks, textbooks, technical references and guides.
- **Available in different formats.** The open access eBook is freely available online and accessible to anyone with an internet connection at anytime. In addition to this free electronic version, a print (paper) edition (hardcover, paperback or dust jacket hardcover) in full color is offered for those who still wish to buy a printed book. Various book sizes are possible for print books. The book format is preliminary discussed together with authors. IFSA Publishing is the first publisher in the World who have started publish full-colour, print, sensors related books.
- **Freely available online.** IFSA Publishing's books are freely and immediately available online at Sensors Web Portal's web links upon publication and are clearly labeled as 'Open Access'. They are accessible to anyone worldwide, which ensures distribution to the widest possible audience.
- **Authors retain copyright.** IFSA Publishing's books are published under the Creative Commons Non-Commercial (CC BY-NC) license. It can be reused and redistributed for non-commercial purposes as long as the original author is attributed.
- **High quality standards.** IFSA Publishing's open access books are subject to the same high level peer-review, production and publishing processes followed by traditional IFSA Publishing's books.
- **Authors benefit from our IFSA Membership Program.** IFSA Publishing books charge an open access fee at the beginning of the publication process. Our payment IFSA Members receive a 10 % loyalty discount on this publication fee.
- **Authors free book copies and tablet.** Authors will get free print (paper) book copies (in full colour and one tablet 'Fire' from Amazon (Quad-Core processor, 1.3 GHz, 1 Gb RAM, 7" (17.7 cm), (1024 x 600), Wi-Fi, 8 GB) free of charge

## Smart Sensor Systems Design: Theory & Practice

Book  
'Digital Sensors and Sensor Systems:  
Practical Design'

Development Board  
EVAL UFDC-1/UFDC-1M-16

### Applications:

- Digital sensors and sensor systems
- Smart sensors systems
- Data Acquisition for frequency-time parameters of electric signals
- Frequency counters
- Tachometers and tachometric systems
- Virtual instruments
- Educational process in sensors and measurements
- Remote laboratories and distance education

More information and order online:

## 10 Top Reasons to Publish Your Articles in S&T Journal

- 1** Sensors & Transducers journal is one of the most popular, peer reviewed open access international journal, published by International Frequency Sensor Association (IFSA) since 2000.  
<http://www.sensorsportal.com>
- 2** Quick publication. The review and publication process take as rule 1-2 months (from the submission until publication).
- 3** Indexed and abstracted very quickly by:
  - Chemical Abstracts
  - EBSCO Publishing
  - IndexCopernicus Journals Master List (ICV=6.13 in 2011)
  - ProQuest Science Journals
  - CAS source Index (CASSI)
  - Ulrich's Periodicals Directory
  - Scirus
  - Google Scholar
  - Knowledge Hub
  - Academic Journal Catalogue (AJC)
- 4** High e-Impact factor: 205.767 (2008), Universal impact factor (UIF) is 0.3529 (2013), Global impact factor: 0.987 (2015).
- 5** The first sensors related journal, published in both formats in full-colour: print (paper, ISSN: 2306-8515) and electronic (pdf, e-ISSN: 1726-5479).
- 6** 12 regular issues per year and additional special issues.
- 7** A very high publicity. The journal's alerts are sending to 54,000+ persons from academia and industry.
- 8** Very reasonable publication fee.
- 9** Wide topics of interest
- 10** Included in the IFSA List of recommended established journals

**Submit your article today !**
