Contents

Contributors.....	19
Foreword	23
Preface	25
1. A Collaborative Environment for Dynamic Geometry Software.....	33
Abstract	33
1.1. Introduction	34
1.2. A Collaborative Environment for Geometry	36
1.3. Collaborative Work in WGL.....	38
1.3.1. A Collaborative Session.....	40
1.3.1.1. Collaborative Session - Students' Perspective	41
1.3.1.2. Collaborative Session - Teacher's Perspective	43
1.3.2. A Pilot Study	44
1.4. Implementation Details	45
1.5. Related Systems	45
1.6. Conclusion & Future Work	45
References	46
2. A Simulation Tool for Telehealth Streams Analysis Based on Pattern Recognition Techniques.....	47
Abstract	47
2.1. Introduction	48
2.2. Methods.....	50
2.2.1. Similarity Analysis.....	50
2.2.1.1. Streams' Reduction	50
2.2.1.2. Similarity Measure.....	51
2.2.1.3. Multivariate Similarity.....	52
2.2.2. Pattern Discovery	53
2.2.3. Prediction	54
2.2.3.1. Prediction Strategy	54

2.2.3.2. Prediction Steps.....	55
2.3. Results	56
2.3.1. Compression Rate	56
2.3.2. Complexity Analysis: Number of Operations	57
2.4. Matlab Tool.....	59
2.4.1. Modules	59
2.4.1.1. Similarity Analysis Module.....	60
2.4.1.2. Prediction Module	60
2.4.2. Illustrative Examples.....	61
2.4.3. Illustrative Example 1: Prediction of Arrhythmic Events.....	62
2.4.3.1. Introduction	62
2.4.3.2. Trend Prediction Comparison	62
2.4.3.3. Assessment of Tachycardia Risk.....	66
2.4.4. Illustrative Example 2: Assessment of Hypertension Risk.....	67
2.5. Conclusion.....	68
Acknowledgements	69
References	69
3. Augmented Reality Tools for Online Exploration.....	71
Abstract	71
3.1. Introduction	71
3.2. Augmented Reality.....	72
3.3. Creating Learning Activity Using Markerless AR Technologies for Kindergarten	74
3.4. Creating Learning Activities Using Marker Based AR Technologies to Teach Music	76
3.5. Augmented 3D Models to Improve Orthographic Views Learning	78
3.6. Augmented Learning as a Tool for flipped Learning	79
3.7. Conclusions	81
References	82
4. BCI Sensor as ITS for Controlling Student Attention in Online Experimentation	83
Abstract	83
4.1. Introduction	83
4.2. Background	85
4.2.1. Attention and Concentration in Education.....	85
4.2.2. EEG Attention Wave's Bio-signal	85

4.2.3. <i>Brain Computer Interfaces (BCI)</i>	86
4.2.3.1. <i>The Use and Types of BCI</i>	87
4.2.3.2. <i>NEUROSKY Headset</i>	87
4.2.4. <i>Online Laboratories</i>	88
4.2.5. <i>Intelligent Tutoring Systems</i>	89
4.3. <i>System Overview</i>	90
4.3.1. <i>System Architecture</i>	90
4.3.1.1. <i>Server Side</i>	91
4.3.1.2. <i>Student Side</i>	91
4.3.2. <i>System Practical Implementation</i>	91
4.3.3. <i>System Use and Gain for Student</i>	92
4.3.3.1. <i>How Students Use System</i>	92
4.3.3.2. <i>ITS Strategies and Reaction for Student Attention Gain</i>	93
4.4. <i>Case Study</i>	94
4.4.1. <i>Web-Lab Operational Modes for Pump Simulation Software</i>	96
4.4.2. <i>Operational Mode of Attention Intelligent Tutor System Reactions</i>	96
4.4.2.1. <i>ITS Reaction for no Attention Signal Detection</i>	97
4.4.2.2. <i>ITS Reaction for Good Attention Level</i>	97
4.4.2.3. <i>ITS Reaction for Low Attention Level</i>	97
4.5. <i>Participants and Methodology Results</i>	98
4.6. <i>Conclusion</i>	99
References	101
5. Building Haptic Infrastructure to Enhance Motivationally Themed Classes..	103
Abstract	103
5.1. <i>Introduction</i>	103
5.2. <i>Motivationally-themed Course Contexts</i>	104
5.3. <i>Robotics Context for Assembly Language Instruction</i>	105
5.4. <i>2D Haptics Support</i>	106
5.5. <i>A Biomedical Context for Computer Graphics, Artificial Intelligence, and Computer Literacy</i>	108
5.6. <i>Model Acquisition</i>	109
5.7. <i>Phantom Omni for Vascular Interaction</i>	112
5.8. <i>Haptic-Graphics Development Environment</i>	113
5.9. <i>Novint Falcon Environment</i>	115
5.9.1. <i>Novint Falcon Application</i>	115
5.10. <i>Conclusion</i>	117
References	117

6. Buildings Maintenance Activity Supported on Virtual Reality Technology	121
Abstract	121
6.1. Introduction	121
6.2. Interactive Applications	123
6.3. The VR Model of Roofs	125
6.3.1. <i>The VR Model of Facades</i>	128
6.3.2. <i>The VR Model of Painted Walls</i>	131
6.4. Conclusions	132
References	134
7. Chemistry in the e-Lab Laboratory: A New Wave	137
Abstract	137
7.1. Introduction	137
7.2. How to Access the e-Lab Platform.....	138
7.3. Description of One Chemistry e-Lab Experiment: Boyle-Mariotte Law	139
7.4. Use of the Boyle-Mariotte Law in Classes and its Application in the Portuguese Curricula.....	140
7.5. Replication of the Experiments	144
7.6. New Chemistry Experiments.....	145
7.7. Conclusions	149
References	150
8. Combining Intelligent Tutoring Systems and Collaborative Environments with Online Labs	153
Abstract	153
8.1. Introduction	153
8.2. Literature Review/Background	155
8.3. Online Labs and Teaching Support Systems.....	157
8.3.1. <i>PLE – Architectures of Online Labs with Learning Management Systems</i>	157
8.3.2. <i>Advantages of Online Labs Integration on a LMS</i>	158
8.3.3. <i>Security of the System</i>	159
8.3.4. <i>PLE – Personal Learning Environment</i>	161
8.3.5. <i>PLE and Ubiquitous Learning</i>	162
8.4. Closing the Gap between Online Labs and Real Labs	162
8.4.1. <i>Collaborative Environments</i>	163
8.4.2. <i>ITS – Intelligent Tutoring Systems</i>	165

8.4.3. <i>Intelligent Tutoring Systems Working Mode</i>	165
8.4.4. <i>Intelligent Tutoring Systems and Ontology</i>	167
8.4.5. <i>Item Response Theory and Decision Support Systems</i>	168
8.4.6. <i>The Adaptive Engine</i>	168
8.5. Analysis and Discussion.....	170
8.5.1. <i>Artificial Intelligence and LMS</i>	171
8.5.2. <i>Laboratory as a Server and Cloud Computing</i>	172
8.6. Conclusions	174
References	175
9. Hybrid Laboratory for Rapid Prototyping in Digital Electronics	179
Abstract	179
9.1. Introduction	179
9.2. Digital Electronics in the University of Deusto and other Institutions	180
9.3. Boole-Deusto.....	182
9.4. Boole-Weblab-Deusto	182
9.5. Weblab-Deusto and Virtual Reality	185
9.6. Remote, Virtual and Hybrid Laboratories.....	186
9.7. The WebLab Hybrid System.....	186
9.7.1. <i>Advantages and Limitations</i>	187
9.7.2. <i>Implementation</i>	188
9.7.3. <i>Hardware</i>	189
9.7.4. <i>Client & User Interface</i>	189
9.7.5. <i>Synthesization System</i>	191
9.7.6. <i>Controller and Model interaction</i>	191
9.8. Conclusion and Future Work	192
References	194
10. IoT in Remote Physiological Data Acquisition	197
Abstract	197
10.1. Introduction	197
10.2. Remote Laboratories: IoT scenarios.....	198
10.3. Remote Laboratories for Biomedical Studies	200
10.4. The Remote Laboratory	201
10.4.1. <i>Remote Laboratory in Education</i>	201
10.4.2. <i>Remote Laboratory in Ambient Assisted Living</i>	204
10.5. Final Comments	204

Acknowledgements	205
References	205
11.MARE: Mobile Augmented Reality Based Experiments in Science, Technology and Engineering.....	209
Abstract	209
11.1. Introduction	209
11.1.1. Online Laboratories	210
11.2. Reality and Virtuality	210
11.2.1. Virtual Reality (VR).....	211
11.3. Augmented Reality (AR).....	212
11.3.1. Visual Augmented Reality.....	213
11.3.2. Technological Advances.....	214
11.4. Mobile Augmented Reality (mAR)	215
11.4.1. Creating Mobile Augmented Reality (mAR) Applications.....	216
11.5. Augmented Reality in Education.....	218
11.5.1. Experiment 1: Augmented Reality Based Experiment in Micro-electronics Engineering.....	219
Augmented Reality (AR) Version.....	220
11.5.2. Experiment 2: Augmented Reality Based Experiment in Communications Engineering.....	221
Augmented Reality (AR) Version.....	222
11.5.3. Evaluation	224
11.6. Conclusion.....	225
References	225
12. Online Presentation of the Performance Portrait Method	229
Abstract	229
12.1. Considered Control Loop	229
12.2. Performance Measures	230
12.3. Nominal Control Analysis and Design.....	233
12.4. Robust Control Analysis and Design	235
12.4.1. Uncertain Plant Gain Ks	236
12.4.2. Uncertain Dead Time Td	237
12.4.3. Two Uncertain Plant Parameters.....	238

12.5. Parameter Impact.....	240
12.6. Web Application	241
Acknowledgment	244
References	244
13. Opening up Education: Quality Matters and Personalization.....	247
Abstract	247
13.1. Introduction	247
13.2. Frame of Reference for Mobile Learning.....	248
13.2.1. <i>Opening up Education: Emergent Open Learning Cultures and Open Education Landscapes.....</i>	248
13.2.2. <i>Mobile Learning and its Definitions.....</i>	249
13.2.3. <i>Learning Design in Mobile Learning</i>	252
13.2.4. <i>Personalization: The Choice of the Individual</i>	254
13.2.5. <i>Quality in Open Learning Environments.....</i>	254
13.3. Discussion and Conclusion	257
References	258
14. Remote Experiment Applied to Teaching Hooke’s Law Using a Didactic Press and Raspberry Pi.....	261
Abstract	261
14.1. Introduction	261
14.2. Objectives of the “Didacdtic Press” Experiment.....	262
14.2.1. <i>Overview of the Experiment and its Components</i>	263
14.2.2. <i>Experiment Platform.....</i>	264
14.2.2.1. <i>Didactic Press.....</i>	264
14.2.2.2. <i>Central Panel for Data Processing and Raspberry Pi.....</i>	267
14.2.2.3. <i>Raspberry Pi Programming</i>	268
14.2.3. <i>The Site and the User Side.....</i>	268
14.3. Executing the Experiment	270
14.4. Results of Experiment Tests.....	270
14.5. Application of Experiment with Students of Technical Education	271
14.6. Conclusion.....	272
References	272
15. Remote Laboratories for Experimental Research and Practical Training in Technological Universities.....	275
Abstract	275

15.1. Introduction	275
15.2. The Development of the World Wide Student Laboratory	276
15.3. Technological Support of Remote Experiments in BMSTU	278
15.4. Educational and Research Remote Laboratories in Bmstu	283
15.4.1. Plasma Nanotechnologies Remote Laboratory for Experimental Research and Practical Training.....	283
15.4.2. Global Navigation Satellite Systems Remote Laboratory.....	285
15.4.3. Space Robotics Internet-laboratory.....	288
15.5. Conclusion.....	291
Acknowledgments	291
References	291
16. Stem Oriented Remote Access Laboratories with Distributed Peer-To-Peer Architecture	295
Abstract	295
16.1. Introduction	295
16.1.1. What are Remote Access Laboratories?.....	296
16.1.2. Deficiencies in Traditional RAL Approach in Terms of STEM	296
16.2. The Concept of Distributed RAL	297
16.2.1. Pedagogical Advantages of Distributed RAL.....	299
16.2.2. Technical Advantages of Distributed RAL	300
16.2.3. Challenges of Distributed RAL Systems	301
16.3. Distributed Remote Access Laboratories	301
16.3.1. Requirements Analysis	301
16.3.2. Instruments and Experiment Characteristics	302
16.3.2.1. Regular RAL Components	302
16.3.2.2. STEM Laboratories	302
16.3.2.3. Micro-Controller Units.....	303
16.3.3. Experiment Control	303
16.3.4. Implementation Strategies for Distributed Remote Laboratories.....	305
16.3.4.1. Remote Laboratories using Web Services.....	305
16.3.4.2. Remote Laboratories using Virtual Private Networks.....	305
16.3.4.3. Using P2P Overlay Networks.....	307
16.4. Examples and Tests	308
16.4.1. Robot RAL-ly.....	308
16.4.2. RALfie - Remote Access Labs for Fun, Innovation and Education.....	309
16.4.3. RALfie - Pre Service Teachers' Course Work Based Trial	310
16.5. Conclusions	311
References	312

17. The Integration of On-site and Online Lab Experimentation – the Way to Attract Engineering Students With Different Learning Styles.....	315
Abstract	315
17.1. Introduction	315
17.2. Related Work.....	317
17.3. Learning Styles.....	319
17.3.1. Matlab Simulations.....	321
17.3.2. Simulink Simulations	321
17.3.3. LabVIEW Simulations.....	321
17.3.4. Hardware Experiments.....	322
17.4. Survey Results Concerning Learning Styles and Preferred Type of DSP Lab Exercises	323
17.5. Conclusion and Future Work	327
Acknowledgment	328
References	328
18. The Pedagogy behind the e-Lab Laboratory	331
Abstract	331
18.1. Introduction	331
18.2. The e-Lab System.....	332
18.3. The Portuguese Syllabus Context	335
18.4. Didacticism: the Exploration of the e-Lab in and out Classrooms.....	336
18.5. The Acceptance of the e-Lab Platform.....	337
18.6. Implementation of e-Learning Courses.....	340
18.7. Some Results Obtained of the Pilot Study	343
18.8. Conclusions	343
References	346
19. The Use of Embedded Smart Modules for Designing Standard-based and Reconfigurable Weblabs	349
Abstract	349
19.1. Introduction	350
19.2. Design of Weblabs	351
19.3. The IEEE1451.0 Std. Adopted to Weblabs	353
19.4. Providing Reconfigurability to Weblabs.....	355

19.5. The IEEE1451.0 Std. and FPGAs for Designing Weblabs	356
19.5.1. Suggested Infrastructures.....	357
19.5.2. Extensions to the IEEE1451.0 Std.....	357
19.6. A Standard-based and Reconfigurable Weblab Prototype	360
19.7. Conducted Validation and Verification.....	362
19.8. Conclusions	364
References	365
20. Transferring On-line Science and Engineering Courses for Use in Developing Countries.....	367
Abstract	367
20.1. Introduction	367
20.1.1. Developing Country Needs.....	368
20.2. Transferring an On-line Course.....	369
20.2.1. Off-lining.....	370
20.3. Example: Off-lining Process of an LCMS	372
20.3.1. Layout and Usage.....	373
20.3.2. Additional Usage Scenarios	376
20.4. Discussion	377
20.4.1. Evaluation	377
20.5. Conclusion.....	380
References	380
21. Unified Remote and Virtual Lab Solutions for Engineering Education.....	383
Abstract	383
21.1. Introduction and Overview.....	383
21.2. Holistic Blended Framework for Research and Education in Mechatronics and Computer Science.....	384
21.3. Technical Concept.....	384
21.4. Robotic HomeLab Kit	385
21.5. Blended Learning Concept.....	386
21.6. How the Technical and Didactical Parts Complement Each Other.....	387
21.7. Online Experimentation in Engineering Curricula.....	388
21.8. Remote Lab Portal.....	389

21.9. Remote Lab Centres	391
21.10. Robotic HomeLab Kit Test Bench	391
21.11. Mobile Robot Lab	392
21.12. Manipulator Lab	392
21.13. Smart Greenhouse	393
21.14. Learning Situations in a Remote Lab Centre	394
21.15. Virtual Lab for Microcontrollers	396
21.16. VMCU Design Conditions	396
21.17. LDL for Configuration and High Level of Modularity	397
21.18. International Engineering Project Cooperation	397
21.19. Summary and Conclusion	398
References	398
22. Using Mobile Devices for Conducting Experimental Practices in Basic Education	401
Abstract	401
22.1. Introduction	401
22.2. Brief Theoretical Reference	403
22.2.1. <i>Technology Integration in Teaching and Learning Processes</i>	403
22.2.2. <i>Remote Experimentation</i>	404
22.3. Materials and Methods	405
22.3.1. <i>Preparatory Phase</i>	405
22.3.2. <i>Implementation Phase</i>	406
22.3.3. <i>Operation Phase</i>	407
22.4. RExMobile App	407
22.5. Results and Discussion.....	411
22.5.1. <i>Applying TPACK Methodology for Teachers</i>	411
22.5.2. <i>Technology Integration in Physics</i>	413
22.6. Conclusions	416
Acknowledgment	417
