

N-15

CUSTOMISEABLE ENDLESS ROTARY SENSOR/POTENTIOMETER

Here is Piher's "revolutionary" answer to the majority of Multi-Purpose Control and Rotary Sensor design problems which were un-resolveable until now. The N-15 series offers you full endless rotation, $340^{\circ} \pm 10^{\circ}$ wide electrical angle, SMD or through-hole mount, extended working temperature range of -40°C to $+120^{\circ}\text{C}$ plus a whole series of customisation possibilities making it the most flexible product on the market. The N15 is ideal for Appliance and Automotive Control and Sensor applications.

For more information about the N-15's features and benefits, please contact your local Piher supplier or consult our web page www.piher.net
