SENSORS & TRANSDUCERS

vol. 91
4/08

A detailed microscopic image of a MEMS (Micro-Electro-Mechanical Systems) device. The image shows a complex array of thin, parallel lines and structures, likely representing the sensor's internal components. The colors are primarily purple and blue, with some green and yellow highlights. The structures are arranged in a grid-like pattern, with some areas showing more intricate, possibly piezoelectric or piezoresistive, patterns. The overall appearance is that of a highly精密, miniaturized electronic component.
