

Formats: printable pdf (Acrobat) and print (hardcover), 120 pages

ISBN: 978-84-615-9732-1,
e-ISBN: 978-84-615-9512-9

AIR GAUGES:

STATIC AND DYNAMIC CHARACTERISTICS

CZESŁAW JANUSZ JERMAK
MIROSŁAW RUCKI

Air Gauges: Static and Dynamic Characteristics presents results of the researches and theoretical investigations on the air gauges performed during several projects were performed successfully by the research team, with 26 patents gained. Further 5 patent applications were initiated, and 4 industrial implementations of innovative devices were made.

The reader will improve his knowledge on the air gauge performance and modeling, will find description of the investigation apparatus and interesting patented solutions of the innovative air gauging heads and measuring systems.

Sensors and Measurement Techniques for Chemical Gas Lasers

Mainuddin
Gaurav Singhal
A. L. Dawar

Sensing and measurement are the key technologies in the development of chemical gas lasers. These advanced technologies are required to acquire, analyze and transform data into information that is useful to enhance the performance and capabilities of these lasers systems.

The goal of this book is to enable scientists and technologists working in rather complex area of chemical lasers to achieve the best technical performances. Till now such topics have been covered scantily in open literature and that too in the research papers only.

Hardcover: ISBN 978-84-617-1152-9
