Research Articles

Sensors Systems for Smartphones, Tablets and IoT: New Advanced Design Approach <i>Javier Cañete, Sergey Y. Yurish</i>	1
Design and Implementation of an Intelligent Expansion Module for Wireless Gas Sensor Networks <i>Grigore Stamatescu, Iulia Stamatescu, Dan Popescu and Valentin Sgârciu</i>	10
Distributed Data Logging and Intelligent Control Strategies for a Scaled Autonomous Vehicle <i>Tilman Happek, Uwe Lang, Torben Bockmeier, Dimitrji Neubauer and Alexander Kuznietsov</i>	17
An Electronic Nose System Sensitive to the Aroma of Ascomycete Tuber <i>Despina Zampoglou, John Kalomiros</i>	23
Sensing of Intelligent Robots Based on Applications of Tactile Slip Displacement Sensors <i>Yuriy P. Kondratenko, Volodymyr Y. Kondratenko, Leonid P. Klymenko, Galyna V. Kondratenko, Eduard A. Shvets</i>	29
Characterizations of Soil Profiles Through Electric Resistivity Ratio <i>Chik Z. and Islam T.</i>	39
Distributed Radio Positioning for Personnel Tracking in Coal Mine Tunnels <i>Andreas Fink, Helmut Beikirch</i>	44
Performance Analysis of Localization Techniques with Generalized Prior Distributions <i>Jonathan R. Tefft, Ranita Bera, Nicholas J. Kirsch, Tat S. Fu</i>	59
Using an Autonomous Scale Ship Model for Resistance and Parametric Roll Tests <i>Fernando Lopez Peña, Alvaro Deibe, Marcos Miguez Gonzalez, Felix Orjales, Daniel Pena</i>	68
Vibration-based Energy Harvesting Systems Characterization Using Automated Electronic Equipment <i>Ioannis Kosmadakis, Vasileios Konstantakos, Theodore Laopoulos, Stylianos Siskos</i>	75
The Study of Classical Polynomial Regression Models Without a Constant Term. Building Empirically Effective Estimates of the Parameters of Regression Models <i>Orest Kochan</i>	82
MEMS Keys as a Way to Delay the Phase of the Microwave Range <i>Anton Antonenko, Michael Geraimchuk, Orest Ivakhiv</i>	94

Metrological Array of Cyber-Physical Systems. Part 3. Smart Energy-Efficient House

Ihor Hnes, Marta Yatsyshyn, Yaroslav Lutsyk 99

Metrological Array of Cyber-Physical Systems. Part 4. Non-Invasive Diagnostics

Zenoviy Kolodiy, Svyatoslav Yatsyshyn, Bohdan Stadnyk 108

Characterization of Platinum Electrodes and In-situ Cell Confluency Measurement Based on Current Changes of Cell-Electrodes

Chin Phong Soon, Mee Kei Foong, Mohd Khairul Ahmad, Rosliza Md Zin, Kok Tung Thong, Kian Sek Tee 113

A Critical Review of MEMS Capacitive Pressure Sensors

Kirankumar B. Balavalad, B. G. Sheeparamatti 120

Preparation of Polyaniline Multi-wall Carbon Nanotubes Nanocomposites Films/Discs and Characterization of their Electrical, Mechanical and Damping Properties

Weiwei Lin, Xiangxing Kong, Cesar Levy 129

Denoising Artifacts from Cardiac Signal Using Normalized Variable Step Size LMS Algorithm

Gowri T., Rajesh Kumar P., Koti Reddy D. V. R., Md Zia Ur Rahman 138

Displacement Measurement

Measurement of Physical and Chemical Quantities Series

Formats: printable pdf (Acrobat) and print (hardcover), 100 pages

ISBN: 978-84-617-3599-0,
e-ISBN: 978-84-617-3617-1

Displacement Measurement constitutes one of the most challenging problems in Mechanical and Civil Engineering, crossing very different applications and scales, from biomechanical and mechanical components to long span bridges and aerospace structures. It is the second contribution from the same authors for the book series Measurement of Physical and Chemical Quantities to be published by IFSA Publishing, focusing on techniques and sensors to measure physical and chemical quantities.

Addressed to researchers with different backgrounds, the book presents in an accessible and concise form the various physical principles and associated techniques for displacement measurement. These comprehend the most classical techniques, based on the measurement of variations with displacement of electrical resistance, capacitance and inductance, or else optical techniques using electromagnetic, acoustic or interference wave measurements, still with open fields of research and offering a wide range of applications. Complementarily and in a clear and systematic way, the authors discuss the advantages and limitations of the various techniques and provide information on the ranges of measurements and associated accuracy.
