## Research Articles

|                                                                                                                                                                                                                                                                                                      |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Semiconductor Gas Sensors Made from Metal Oxides Functionalized with Carbon Nanotubes</b><br><i>Vladimir Aroutiounian</i> .....                                                                                                                                                                   | 1  |
| <b>Inkjet-printed Differential Amplifiers with Single-walled Carbon Nano Tubes Transistors with Sensor Applications</b><br><i>R. Kamali-Sarvestani and B. Wright, K. Triyasakorn</i> .....                                                                                                           | 17 |
| <b>Characterization of Polymer-based PMUT for Short-range Gesture Recognition Applications</b><br><i>Pieter Gijzenbergh, Alexandre Halbach, Yongbin Jeong, Guilherme Brondani Torri, Margo Billen, Libertario Demi, Chih-Hsien Huang, David Cheyys, Xavier Rottenberg and Veronique Rochus</i> ..... | 23 |
| <b>Feedback Process Control for Nano-manufacturing of Semiconductor Circuits</b><br><i>Wolf Kohn, Anil Nerode and Zelda B. Zabinsky</i> .....                                                                                                                                                        | 31 |
| <b>Utilization of the Flexible Fractional Josephson Toroidal Arrays for Sensing, Memory Storage and Quantum Computing</b><br><i>E. T. Chen, J. T. Thornton, P. T. Kissinger, S.-H. Duh</i> .....                                                                                                     | 38 |
| <b>Nanostructure Protein Toroidal Array Devices Promoted Room Temperature Superconductivity and Direct Sensing of Collagen-1</b><br><i>E. T. Chen, J. T. Thornton, P. T. Kissinger, S.-H. Duh</i> .....                                                                                              | 56 |
| <b>A Novel Approach for Simple, Fast and Cheap Packaging of MEMS and MMIC</b><br><i>G. A. Merletti, J. A. Lonac, J. J. Ortiz, D. Casulla, C. F. Longo, D. de Lima, C. L. Arrieta ..</i>                                                                                                              | 71 |
| <b>Geometry Dependence of the Response of Inter-digital Capacitive Structures: A Finite Element Analysis</b><br><i>Sheeja P. George, Johnney Issac and Jacob Philip</i> .....                                                                                                                        | 79 |
| <b>The Novel Fall Detection and Prevention Algorithm for Elderly People</b><br><i>Jong-Ha Lee</i> .....                                                                                                                                                                                              | 87 |
| <b>Comment on 'Design of MEMS Cantilever - Hand Calculation'</b><br><b>[Sensors &amp; Transducers Journal, Vol. 91, Issue 4, April 2008, pp. 55-69]</b><br><i>Manoj Kumar Dounkal, R. K. Bhan</i> .....                                                                                              | 92 |

Authors are encouraged to submit article in MS Word (doc) and Acrobat (pdf) formats  
by e-mail: [editor@sensorsportal.com](mailto:editor@sensorsportal.com). Please visit journal's webpage with preparation instructions:
