NANOSENSORS: Materials and Technologies

Hardcover: ISBN 978-84-616-5378-2
e-Book: ISBN 978-84-616-5422-2

Nada F. Atta, Ed.

Nanosensors: Materials and Technologies aims to provide the readers with some of the most recent development of new and advanced materials such as carbon nanotubes, graphene, sol-gel films, self-assembly layers in presence of surface active agents, nano-particles, and conducting polymers in the surface structuring for sensing applications. The emphasis of the presentations is devoted to the difference in properties and its relation to the mechanism of detection and specificity. Miniaturization on the other hand, is of unique importance for sensors applications. The chapters of this book present the usage of robust, small, sensitive and reliable sensors that take advantage of the growing interest in nano-structures. Different chemical species are taken as good example of the determination of different chemical substances industrially, medically and environmentally. A separate chapter in this book will be devoted to molecular recognition using surface templating.

The present book will find a large audience of specialists and scientists or engineers working in the area of sensors and its technological applications. The *Nanosensors: Materials and Technologies* will also be useful for researchers working in the field of electrochemical and biosensors since it presents a collection of achievements in different areas of sensors applications.

The Sixth International Conference on Sensor Device Technologies and Applications

SENSORDEVICES 2015

23 - 28 August, 2015 - Venice, Italy

Deadline for papers: 24 March, 2015

Tracks:

Sensor devices • Ultrasonic and Piezosensors • Photonics • Infrared • Gas Sensors - Geosensors • Sensor device technologies • Sensors signal conditioning and interfacing circuits • Medical devices and sensors applications • Sensors domain-oriented devices, technologies, and applications • Sensor-based localization and tracking technologies • Sensors and Transducers for Non-Destructive Testing

The Eighth International Conference on Advances in Circuits, Electronics and Micro-electronics

CENICS 2015

23 - 28 August, 2015 - Venice, Italy

Deadline for papers: 24 March, 2015

Tracks:

Semiconductors and applications
Design, models and languages
Signal processing circuits
Arithmetic computational circuits
Microelectronics
Electronics technologies
Special circuits
Consumer electronics
Application-oriented electronics

<http://www.iaria.org/conferences2015/CENICS15.html>

The Ninth International Conference on Quantum, Nano/Bio, and Micro Technologies

ICQNM 2015

23 - 28 August, 2015 - Venice, Italy

Deadline for papers: 24 March, 2015

Tracks:

- Nano/Biosensing
- Quantum technologies
- Quantum security
- Nano technologies
- Micro technologies
- Application nano/micro domains
- Nano and micro materials and properties
- Microfluidics and nanofluidics
- Superconductivity, materials and applications
- Nano and bio robotics
